## ANTI-VIRUS FILTER

Once the UV light shines on the Titanium Dioxide in the filter, electrons will interact with water molecules in the air and will produce highly reactive hydroxyl ions, these ions will combine to the pollutants turning them into harmless substances such as carbon dioxide and water.

## BUILT-IN UVC STERILIZER

3rd Generation UVC++ LED, 30° working angle, powerful light gathering, enhance the sterilization rate to 200%.

1st generation : 100mm length with 120° angle.  
2nd generation : 200mm length with 60° angle.  
3rd generation : 400mm length with 30° angle.

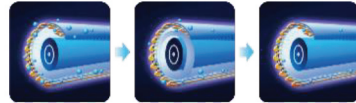

## SELF CLEAN

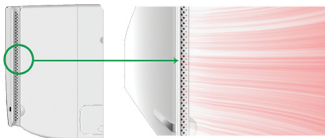

When self clean function is on, the temperature of evaporator drops down sharply and soon the frost and ice are generated. Then the turbo heating will turn on with temperature up to 58 degrees to melt the ice and dry the water. All the dusts are removed and bacteria is sterilized.

## MILDEW PROOF

When the air conditioner is turned off, the fan will continue to work for 3 minutes and thus will keep the unit from mildew.

## BREATHING HOLE DESIGN

Designed with a breathing hole located in the side of the unit, this will increase the efficiency and air flow by 8%.
